

**HEATO  
CHAIR**

# HEATOCHAIR

Heatochair is an innovative office solution that integrates a chair with a percolator, designed to offer personal warming and energy-saving advantages. This product is particularly effective in addressing the common issue of cold legs and feet, which is prevalent during colder seasons or in work environments where adjusting the ambient temperature is either impractical or prohibited.

# KEY PRODUCT FEATURES OF HEATOCHAIR

## 1. Comprehensive Body Heat Coverage:

Designed to ensure maximum warmth, targeting key areas to provide full coverage and alleviate cold legs and feet effectively.

## 2. Minimized Waste Heat:

Engineered for efficiency, the chair reduces unnecessary heat loss, ensuring that the generated warmth is utilized optimally for user comfort.

## 3. Innovative Chair-Percolator-Blower Integration:

Combines the functionalities of a chair, a percolator, and a blower in one cohesive unit, offering a seamless heating solution that enhances both comfort and energy efficiency.

# INNOVATION POINTS OF HEATOCHAIR

Three main features

**Radiation:**

In the context of HeatOChair, radiant heating could involve heating elements that emit infrared radiation to directly warm the user's body.

**Convection:**

In HeatOChair, convection could involve a blower that circulates warm air around the user's legs and feet.

**Conduction:**

In HeatOChair, conduction might refer to heat being transferred from heated components within the chair to its surface, which then warms the user through direct contact.

### Other innovative features:

1. Automatic Temperature Control:

Damper and Sensor System

2. Upward Heat Transfer:

Controlled Heat Distribution

3. Safety Measures:

.Fire Prevention

.Burn Protection

.Anti-Tip Design

These features highlight HeatOChair's commitment to combining advanced heating technology with safety and user comfort.

# MARKET SIZE

Heatochair Corporation is poised for significant growth in the expanding U.S. office furniture market and the global heating equipment market. The robust construction and remodeling activities in commercial and office buildings are driving the demand for new office furnishings, positioning Heatochair to capitalize on these trends.

## U.S. OFFICE FURNITURE MARKET

The U.S. office furniture market is projected to reach USD 14.31 billion by 2025. This vigorous growth is driven by:

- 1) Increased Commercial Construction: A surge in new office buildings and commercial spaces.
- 2) Office Remodeling
- 3) Furnishing Demand
